

```
std::unary_function  
< std::string, std::  
    size_t >
```

```
graph BT; A[pion::ihash] --> B[std::unary_function< std::string, std::size_t >];
```

A diagram illustrating a relationship between two C++ types. At the bottom is a gray rectangular box containing the text `pion::ihash`. A blue arrow points vertically upwards from the top center of this box to the bottom center of a larger white rectangular box above it. The white box contains the text `std::unary_function` on the first line, `< std::string, std::` on the second line, and `size_t >` on the third line. This represents `std::unary_function< std::string, std::size_t >`.

```
pion::ihash
```
